

/// ABRASIVES & MINERALS ///

8750 Boul. Industriel, Trois-Rivières (Québec) Canada, G9A 5E1

Date: 2019-12-19

To whom it may concern,

This letter is intended to inform that our product, commercially named as Maxiblast, produces cold sparks that does not ignite flammable vapors, according to the Thornton Laboratories, Shell Research Ltd UK report. However, every recommendation that is enclosed in this report must be respected in order to maintain a safe work environment in such conditions.

A handwritten signature in black ink, consisting of a stylized 'D' and 'B' followed by a horizontal line.

Dave Beaudoin

Technical manager – Bellemare Abrasives & Minerals
